		Type of property									
		String	Long	Integer	Float	Double	Boolean	Date	Money		
	String	Supported	Supported if the value can be converted to Long	Supported if the value can be converted to Integer	Supported* if the value can be converted to Float (rounding takes place when converting)	Supported* if the value can be converted to Double (rounding takes place when converting)	compatible. 'true', 'on', 'yes'	Supported** if the value can be converted to Date (e.g. "2020-01-	Supported if the value is numeric or can be converted to Money (rounding takes place when converting)		
Type of Id value	Long	Supported	Supported	Supported but exceeding the capacity of Integer result in the conversion of the overflown value	Supported* but conversion may lead to collision of values	Supported* but conversion may lead to collision of values	Not supported (conversion of Number to Boolean always returns false)	Supported (interpreted as milliseconds since 1 Jan 1970)	Not supported		
Тур	Integer	Supported	Supported	Supported	Supported* but conversion may lead to collision of values	Supported*	Not supported (conversion of Number to Boolean always returns false)	Supported (interpreted as milliseconds since 1 Jan 1970)	Not supported		
	Float	Not supported	Not supported	Not supported	Not supported	Not supported	Not supported	Not supported	Not supported		
	Double	Not supported	Not supported	Not supported	Not supported	Not supported	Not supported	Not supported	Not supported		

	Boolean	Supported	Not supported	Not supported	Not supported	Not supported	Supported	Not supported	Not supported	
		Date	Supported	Not supported	Not supported	Not supported	Not supported	Not supported (conversion of Date to Boolean always returns false)	Supported (ISO8601 format is enforced for Data Engine compatibility)	Not supported
		Money	Supported	Not supported	Not supported	Not supported	Not supported	Not supported (conversion of Money to Boolean always returns false)	Not supported	Supported

^{* =} only for Catalog Rules created **before Appway 10.1.0**. Starting from Appway 10.1.0, only properties of type String, Long, Integer, Boolean, Date and Money can be selected in Catalog Values Rules.

^{** =} if the String value is bound to a Locale (e.g. "2020-06-Mon") and a Format Pattern without a Locale is defined, the system will read the current Locale when trying to match the Format Pattern. This may lead to conversion issues for certain Locales.
