```

Appway Platform (Core)

Change

Area	Importance	Description
Data Table	Low	Performance when rendering the interline has been improved by skipping the update and validate phases when a user opens an interline.
Phase Control	Low	Added descriptions of the properties.

Bugfix

Area	Importance	Description
Script Language	Low	Fixed a parameter conversion inconsistency in Script functions, Static methods, and Instance methods.
Script Language	Low	Fixed an issue where quotation marks were added to optional parameters of the type String when the function was called via HTTP.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	Relational Database Hazelcast Store Extension 6.2.9: - Feature: A warning is issued if a single store operation takes more than 10 seconds.

Change

Area	Importance	Description
Extension	Low	Component Extension 6.3.21: Adaptive Flow Layout ---------- -Bugfix: The height of AFL Elements is now calculated correctly to avoid white space in cases where AFL Groups (empty or not) are placed between AFL elements. Dropdown List ---------- -Change: The Clear icon ('x') is now displayed on initialization if there is a preselected value. -Change: Reduced the area of the list container so that the user has a visual indication that there are more options and it is necessary to scroll. -Change: Increased the size of the Clear icon ('x') to improve usability on touch devices. -Change: Increased the size of the popup of the Dropdown List on tablets to provide a larger swipe area. Additionally, the popup closes when the user swipes on any other area of the tablet. -Bugfix: For Catalogs using lazy loading: When an option is selected by typing in the search field and immediately pressing the Enter key, the first option of the filtered list is now selected. -Bugfix: The Clear icon ('x') is now hidden when the popup is open. -Bugfix: The Clear icon ('x') is now hidden when the popup is closed and the "Allow resetting to empty state marked by placeholder" property is deselected.

		Notifications ---------- -Change: Added language labels for the Notification List and Notification Topic Subscription components.
Extension	Low	Portal Work List Extension 5.0.5: - Change: Added language labels for static strings.
