Release Notes 7.2.16 — Appway Component Extension
Patch Release | 04.03.2020

Changes since version 7.2.15 of the Component Extension.

Dropdown List

- Fixed an issue where the 'Dropdown List' Screen Component received the focus and expanded even if disabled. This issue occurred when tabbing through fields.

Dropdown List and Multiple Selection Field

- Fixed an issue in the 'Dropdown List' and 'Multiple Selection Field' Screen Components where lazy loading entries from a Catalog did not work as expected. For more information, see the related article.

Important! The Component Extension 7.2.16 is only compatible with Appway 7.2.16 and higher.
