Release Notes 6.2.26 - Patch Release | 07.11.2016

Remarks

```
Release notes with changes since version 6.2.25.

Upgrade notes:
No special actions are required when upgrading from Appway 6.2.25 to 6.2.26.
```

Appway Platform (Core)

Bugfix

Area	Importance	Description
Script	Low	URLs calling Appway Script functions now handle parameters correctly in the following situation: a) the exposed function has more than one parameter, and b) no value is assigned to one of the parameters in the URL
SSL	Low	Fixed an "SSL Exception: PrivateKey not found" connection error that occurred despite the private key being present (when debug is not enabled and client authentication is used).

Appway Extensions

Change

Area	Importance	Description
Extension	Low	CassandraHazelcastStore Extension 11.0.1: - Change: The extension now supports providing user credentials to the Cassandra cluster using an external identity provider.

Bugfix

Area	Importance	Description
Extension	Low	ProcessAuditTrail Extension 2.2.3: - Bugfix: Fixed a possible endless loop that could occur while consuming Log commands.
