and-naming-2330990871051
```

Appway Platform (Core)

Bugfix

Area	Importance	Description
Process Messages	Medium	Fixed an issue where the Receive Message Intermediate Event might miss Process Messages. This could happen (a) if the clocks in the Cluster were not fully aligned, or (b) if multiple Process Messages were added at the same time. Moreover, the new system property 'nm.processmessages.receiveMessageIntermediateEvent.lookBackTime' (default value = 20000) can be used to configure the time we go back to find delayed messages.

Appway Extensions

Bugfix

Area	Importance	Description
Extension	Medium	ComponentExtension 2022.2.7: Fixed an issue which prevented copy-pasting text by drag-and-drop on Text Input Controls when a File Chooser Screen Component was rendered on the page.
