https://community.appway.com/screen/kb/article/appway-10-known-issues-1879068360031

For information on the Appway product lifecycle, see:
https://community.appway.com/screen/kb/article/appway-releases-product-lifecycle-and-end-of-
support-1753664569425
```

Appway Platform (Core)

Feature

Area	Importance	Description
Memory Usage	Low	Added options to pause a Memory Usage Job (through the 'nm.memoryusage.job.paused' configuration property) and to schedule it at custom intervals (through the 'nm.memoryusage.job.schedule' configuration property), respectively.

Bugfix

Area	Importance	Description
Checkbox	Low	Fixed an issue affecting the 'Checkbox' Screen Component, which caused the checkbox to be selected even when clicking outside the input element or its label.
Data Logic	Medium	Fixed an issue, occurring in very rare situations, which caused Java threads to get stuck when initializing Data Logic variables.
Memory Usage	Low	References to Bricks are excluded when computing memory usage. This fixes a high resource consumption issue when a Memory Usage job runs.
Package Import/Export	Low	Package Export: Fixed an issue where the 'Export Packages' wizard was sometimes showing the same Package version multiple times in the 'Select Version' dropdown list.

Appway Extensions

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 10.1.8: - Adaptive Flow Layout: 'Adaptive Flow Layout Full-Width Element' Screen Components now correctly occupy the whole space on the screen. - Checkbox List: Fixed an issue affecting the 'Checkbox List' Screen Component, which caused the checkboxes to be selected even when clicking outside the input elements or their labels.
