Cluster Log	Medium	Fixed a race condition which might affect busy systems. The effect of this race condition was that the Cluster Log Flusher thread disappeared and, therefore, the Cluster Log became empty.
Format Business Object	Low	Fixed an issue that caused a global error to be shown on the page when setting a field linked to a Float or Double format to value -0. Note that this issue affects mainly App Tasks.
Re-Login	Medium	Fixed an issue where the federated IDP hint was not provided to the Re-login Script Function. Note that this issue affects mainly App Tasks.
Screen Editor	Low	Fixed an issue that caused the field 'Descriptive Icon Id' of the 'Button' Screen Component to be ignored when performing a search in the Screen Business Object.
