Remarks

```
Release notes with changes since version 7.1.1.

Upgrade notes when upgrading from 7.0.x:
- If your Appway installation uses a Relational database or Cassandra as a cluster storage
backend, you need to create the 'piindexdefinitions', 'piindexstatuses', 'piindexdata', and
'piindexdatasizes' tables manually. See the 'Cluster Storage Update' section in 'System
Upgrade: 6.3 to 7.x' for details: https://community.appway.com/screen/kb/article/system-
upgrade-6-3-to-7-0#22-cluster-storage-update
- To provide better guidance and avoid inadvertent styling specification errors, the
possibility to use 'not set' as a value for style references inside 'Style' Business Objects
was removed. In the unlikely situation that 'not set' was used to define a style reference,
validation returns an error in Appway 7.1. Fix the issue by specifying a 'Style' Business
Object for the affected style reference(s).

For details on upgrading to Appway 7.1 from Appway 6.3, see the article: 'System Upgrade: 6.3
to 7.x' at:
https://community.appway.com/screen/kb/article/system-upgrade-6-3-to-7-0

For documentation of new and existing features, see the Appway Knowledge Base at:
https://community.appway.com/screen/kb

For information on Known Issues in Appway 7, see:

-and-8-0
```

Appway Platform (Core)

Bugfix

Area	Importance	Description
Custom Lists	Low	Fixed an issue where adding a high number of Business Objects to a Custom List was very slow and memory-consuming.
HTTP Tracing	Low	Fixed an issue where the 'HTTP Tracing' tool (System Maintenance) was not working in locales using commas instead of dots as decimal separators.
Label Manager	Medium	Fixed an issue where only a few label translations were displayed in the Label Manager.
Packages	Low	Fixed an issue where, when importing a Package with a logo, the logo was not displayed correctly in the 'Import' module and an error was thrown.
Security	Low	Fixed an issue where the StorePasswordTask performed a check on the length of the password to be stored, despite not being a crypto key.

Appway Extensions

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 7.1.2: - Bugfix: Fixed the following issue for all Screen Components: When you migrated a batch of components from Legacy Styles to 'Style' Business Objects through the Styling Migration Tool, the migration did not take place.
Extension	Low	DataStore Extension 3.3.9: - Bugfix: Fixed a 'connection closed' error which occurred when calling the SelectDataEntityIds function. - Bugfix: Fixed an issue with the deletion of entities in Indexed properties of a mapped Data

		Class when calling the SaveDateEntity function. - Bugfix: Fixed an issue which prevented the removal of history tables and triggers. - Bugfix: Fixed an issue with entities mapped in AW7.x when using the DataStoreExportToCSV function.
Extension	Low	Signature Extension 3.0.1: - Bugfix: The mouse event coordinate detection now works properly, thus allowing drawing properly on the canvas following the mouse pointer.
