Release Notes 6.3.20 - Patch Release | 08.02.2017

Remarks
```
Release notes with changes since version 6.3.19.

Upgrade Notes:
No special actions are required when upgrading from Appway 6.3.19 to 6.3.20.
```

Appway Platform (Core)

Change

Area	Importance	Description
Cluster Storage Sensor	Low	The minimum number of 100 operations, which was applied to dynamic period selection, was removed to allow the sensor to recover from errors more quickly.
Screen Editor	Low	Deprecated Screen Components are now displayed with a 'strikethrough' text style in the Screen Editor library.

Bugfix

Area	Importance	Description
Integration Link	Low	Fixed an issue where an Integration Link was left in an inconsistent state if there was an exception while starting it. Now, when an Integration Link is restarted after a failure, it works correctly.
Integration Link	Low	Fixed an issue where ID refactoring failed when a Message Router component was used in an Integration Link.
Processes	Low	The value of the 'Participant' field of a Swimlane component no longer overwrites this value in other swimlanes when copying and pasting the swimlane.
Refactoring	Low	Refactoring a Font Style Business Object ID is now correctly applied to the 'Font Style' Value Field Parameter of the PDF Output Business Object.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	CassandraHazelcastStore Extension 11.0.4: - Feature: Added the possibility to set a custom value for the Cassandra driver read timeout. Use the following extension property to do so: com.nm.cluster.cassandra.readTimeoutMillis. - Change: Removed the 'exists' check when writing or deleting rows.
