## Bugfix

| Area | Importance | Description |
| --- | --- | --- |
| Extension | Medium | Component Extension 10.1.12:<br><br>Dropdown List/Multiple Selection Field: Fixed an issue affecting 'Dropdown List' and 'Multiple Selection Field' Screen Components when a 'Catalog' Data Source was replaced by a different Catalog. In this scenario, lazy loading was not working properly, thus preventing results from being displayed while scrolling through the entries. |
