Remarks

```
Release notes with changes since version 8.1.2.

Upgrade note when upgrading from 8.1.2: for compatibility reasons, you must update both Appway
Core and the Component extension to version 8.1.3.

For upgrade information when upgrading to Appway 8.1 from Appway 7.2, see the 'System Upgrade:
7.2 to 8.x' article:
https://community.appway.com/screen/kb/article/system-upgrade-7-2-to-8-x-1633271182989

For upgrade information when upgrading to Appway 8.1 from Appway 8.0.x, see this section of
the 'System Upgrade: 7.2 to 8.x' article:
https://community.appway.com/screen/kb/article/system-upgrade-7-2-to-8-x-
1633271182989?version=8#323-new-default-values-in-style-business-objects-with-appway-81

For new Appway 8.1 installations, see the Installation Guide:
https://community.appway.com/screen/kb/article/system-installation-appway-8-1657699102392

For information on Known Issues in Appway 8.1, see:
https://community.appway.com/screen/kb/article/appway-8-known-issues-1681371580713

For documentation of new and existing features, see the Appway Knowledge Base at:
https://community.appway.com/screen/kb

For an overview of the documentation of new Appway 8 features, see:
https://community.appway.com/screen/kb/article/system-upgrade-7-2-to-8-x-1633271182989#33-
adopting-new-features

https://community.appway.com/screen/kb/article/appway-releases-product-lifecycle-and-end-of-
support-1753664569425
```

Appway Platform (Core)

Change

Area	Importance	Description
Access Policies	Medium	In case an Access Policy cannot be evaluated, an ERROR message is added to the logs indicating that this issue needs to be fixed before upgrading to Appway 10 to ensure continued access through this Access Policy.
Appway Unit	High	The Appway unit of measurement has been changed from rem to pixel. This fixes an issue occurring in some browsers when displaying the Workspace, where the font size was unusually large or other screen elements were displayed incorrectly.

Bugfix

Area	Importance	Description
Icons	Low	Fixed an issue where SVG icons contained in legacy-styled Screen Components incorrectly showed a tooltip when hovering over them.
Integration Links	Low	Fixed an issue in the Integration Link 'Preview' tab where Package and Business Object visibility was not correctly handled in the 'Message Body' Script Editor.
Packages	Low	Improved performance when loading the Package Overview.
Script Editor	Low	Fixed an issue that made the Script Editor unresponsive when using the cursor key to scroll through long scripts.

Appway Extensions

Change

Area	Importance	Description

Extension	High	Component Extension 8.1.3: IMPORTANT NOTE: The Component extension 8.1.3 is only compatible with Appway 8.1.3 and higher. Appway Unit ---------- - Change: The Appway unit of measurement has been changed from rem to pixel. This fixes an issue occurring in some browsers when displaying the Workspace, where the font size was unusually large or other screen elements were displayed incorrectly. Form Screen Component ---------- - Bugfix: Fixed an issue where the yellow dots indicating an inconsistency were displayed for the wrong fields. Info Table and Info Table Row ---------- - Bugfix: An invalid value for the 'Highlighted' property is now only taken into account when the 'Info Table Row' Screen Component is of type 'Body', meaning that it no longer causes an Error box in the Workspace for the other types of Info Table Rows. Style and Style Value Business Objects ---------- - Bugfix: Fixed an issue where the properties of custom 'Style' Business Objects might unexpectedly be overwritten by the system.
Extension	Low	Inbox Extension 2.0.4: - Change: Added the following previously missing methods for the WorkflowTokenStatusUtil Primitive Type: getSuspendedStatusCode(), getOutgoingStatusCode(), and getReadyStatusCode().

Bugfix

Area	Importance	Description
Extension	Low	Functions Extension 4.0.4: - Bugfix: The ExecuteDistributed function now correctly searches for variable definitions in the parent scope.
