Remarks

```
Release notes with changes since version 10.1.4.

For upgrade information when upgrading to Appway 10.x from Appway 9.1.x, see the 'System
Upgrade: 9.1 to 10.x' article:
https://community.appway.com/screen/kb/article/system-upgrade-9-1-to-10-x-1913013030042

For new Appway 10 installations, see:
- System Installation guide: https://community.appway.com/screen/kb/article/system-
installation-appway-10-1901075430266
- System Installation Using Containers guide:
https://community.appway.com/screen/kb/article/system-installation-using-containers-appway-10-
1951018786136

For documentation of new and existing features, see the Appway Knowledge Base at:
https://community.appway.com/screen/kb

For information on deprecated and removed features in Appway 10, see:
https://community.appway.com/screen/kb/article/feature-removal-and-deprecation-with-appway-10-
1869373509251

For information on Known Issues, see:
https://community.appway.com/screen/kb/article/appway-10-known-issues-1879068360031

For information on the Appway product lifecycle, see:
https://community.appway.com/screen/kb/article/appway-releases-product-lifecycle-and-end-of-
support-1753664569425
```

Appway Platform (Core)

Feature

Area	Importance	Description
Login Page	Low	The new configuration property 'nm.login.formbased.enabled' can be used to disable the login form on Appway's default login page. The new configuration property 'nm.login.openidconnect.enabled' can be used to disable the OpenID Connect integration on Appway's default login page. Note: This feature has been developed specifically for Cloud installations.
Value Store Splitting	Low	Immutable Data Value instances (e.g. Strings, Integers, Booleans, and so on) are now allowed to be exposed outside of the Process Context.

Bugfix

Area	Importance	Description
Data Class Editor	Medium	Fixed an issue causing a debounce cycle in the Data Class Editor Filter field.
Data Class Editor	Medium	Fixed an issue where adding a Property or Function in the Data Class Editor did not expand the related card.
Data Logic	Low	Allow multiline - Fixed an issue that caused a validation to be unnecessarily reported in the Data Logic editor and in the Data Gathering for 'Single Property Expression' Data Rules that are used only to specify the 'Allow multiline' setting. See documentation: https://community.appway.com/screen/kb/article/data-logic-business-object-1739928404187#244-single-property-expression
Export Packages	Medium	Fixed an issue in the export of Packages that causes the .awdeployment file to contain duplicate entries for Business Objects. This issue happened under these circumstances: the Package was imported into a system containing a newer version of the same Package (e.g. after a re-import); the Package was imported in its 'latest modified' (head) version.
Integration Links	Medium	Fixed an issue that prevented the correct evaluation of default expressions in Integration Link assigned variables when the assignment expression was filled and then removed in the Integration Link Task or Source. If such behavior was used in your Solution to avoid the evaluation of default expressions in Integration Link assigned variables under given circumstances, please contact Appway Support to get further information.
Validation	Medium	Fixed an issue where a validation error was wrongly returned by a 'Style' Business Object,

		if the 'Style' had the same Id as a Data Class Business Object.
Workspace	Medium	Fixed an issue where Workspace screens returned an error or were rendered incorrectly with Appway running on a WebSphere AS.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	AppTask, AppTaskAPI, DataGathering Extensions 1.4.0: See the Data Gathering v1.4 Release Notes: https://community.appway.com/screen/support/news/release-data-gathering-v1-4-2174133168721
Extension	Low	NmLoginServiceAdapter Extension 1.4.0: The new configuration property 'nm.auth.loginservice.caseinsensitive' can be used to enable or disable case-insensitive login.

Bugfix

Area	Importance	Description
Extension	High	Component Extension 10.1.5: - Adaptive Flow Layout Screen Component: Fixed an issue that prevented the 'Show As Popup' action from working on elements placed inside an Adaptive Flow Layout. - Dropdown List Screen Component: Fixed an issue where the text entered in the Dropdown List search field was deleted while typing. - Info Table Screen Component: Fixed an issue occurring in Package and global validation, where the Info Table returned an Internal Error.
Extension	Medium	IntegrationLinkComponents Extension 1.6.2: Integration Links - Fixed an issue that prevented the startup of Integration Links when they tried to connect to an ActiveMQ broker with authentication enabled.
Extension	Medium	WorkspaceCollaboration Extension 4.0.6: Fixed an issue where Workspace screens returned an error or were rendered incorrectly with the WorkspaceCollaboration Extension installed and Appway running on a WebSphere AS.
