support-1753664569425
```

Appway Platform (Core)

Change

Area	Importance	Description
Data Class Editor	Low	Validation messages triggered by missing inherited properties have been lowered from Warning to Info.
Security	Medium	Some components of Appway have been changed to use SHA-256 as hash algorithm instead of MD5: - Line signatures in audit log files. - Signatures for Base64-encoded view state and window state embedded in Workspace forms.

Bugfix

Area	Importance	Description
Integration Links	Medium	Fixed an issue that prevented the correct startup of Integration Links at Appway startup when using the IntegrationLinkComponents Extension.
Business Object patching	High	When patching a Business Object that was on the latest committed version or on Head, the cache behind the Business Object in Appway Studio was not updated. This might cause the following: - Errors when exporting Packages - Errors when importing Packages to Head - The Package Overview page might show incorrect information on Package modifications ("black dot") - Errors might occur when listing WebAPIs or Custom lists - Other Package operations related to 'Move Business Object' , 'Make Business Object visible' or 'Make Business Object replaceable' might fail This solves Known Issue KI-101-23: https://community.appway.com/screen/kb/article/appway-10-known-issues-1879068360031#fixed-issues-in-the-core-platform
Data Class Editor	Low	Fixed an issue affecting only Safari browsers which prevented the context menu to appear when right-clicking on empty areas.
Data Class Editor	Medium	Fixed an issue occurring when you opened a Data Class Function by double-clicking on it in the Data Class Editor: an error was displayed with the following message: "Script Function Package '' doesn't match Business Object Package 'CurrentPackageId'".

		This solves Known Issue KI-101-20: https://community.appway.com/screen/kb/article/appway-10-known-issues-1879068360031#fixed-issues-in-the-core-platform
Data Class Editor	Low	Fixed an issue that caused some missing inherited properties (properties removed from a parent Data Class, or coming from removed parents in the hierarchy) to appear as valid inherited properties.
Data Class Editor	Medium	Fixed an issue where incorrect context menu options were shown when clicking on a property after a filter had been set.
Data Logic Editor	Low	Fixed an issue affecting only Safari browsers which prevented the content of the 'Variables' tab from being shown correctly.
Variable Assignments	High	Fixed an issue where it was not possible to assign a variable to a Label from the Label Business Object editor (the 'Add Variable' button was disabled). This solves Known Issue KI-101-22: https://community.appway.com/screen/kb/article/appway-10-known-issues-1879068360031#fixed-issues-in-the-core-platform.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	DefaultIcons Extension 4.1.1: - Feature: Icons: The following icons have been added: missing link, missing file, tag, tag linear. - Change: SVG icons Removed title tags from SVG icons containing the name of the file (e.g., <title>32</title>) which were incorrectly displayed as icon tooltips.

Bugfix

Area	Importance	Description
Extension	Medium	AppTask Extension 1.1.0: The AppTask Extension 1.1.0 is released with the DataGathering v1.1. See Release Notes: https://community.appway.com/screen/support/news/release-data-gathering-v1-1-2087516463639
Extension	Medium	AppTaskAPI Extension 1.1.0: The AppTaskAPI Extension 1.1.0 is released with the DataGathering v1.1. See Release Notes: https://community.appway.com/screen/support/news/release-data-gathering-v1-1-2087516463639
Extension	Low	Component Extension 10.1.2: - Adaptive Flow Layout: Text Areas can no longer be resized if placed inside an 'Adaptive Flow Layout' Screen Component. - Adaptive Flow Layout: Fixed an issue where 'Adaptive Flow Layout' and 'Adaptive Flow Layout Group' Screen Components preserved the spacing of their Info Box child elements, whenever an action required their reload. - Dropdown List. Fixed an issue that caused the automatic scrolling of the page when opening a 'Dropdown List' Screen Component.
Extension	Low	DataAuditTrail Extension 4.0.1: Data Class Configuration: Fixed an issue which prevented the proper usage of the 'Select Data Class' dropdown list following a 'Save' action.
Extension	Low	DataGathering Extension 1.1.0: DataGathering Extension 1.1.0 is released with the DataGathering v1.1. See Release Notes: https://community.appway.com/screen/support/news/release-data-gathering-v1-1-

		2087516463639
Extension	Low	IntegrationLinkComponents Extension 1.6.1: Fixed an issue that prevented the correct startup of Integration Links at Appway startup when using the IntegrationLinkComponents Extension.
Extension	Low	RelationalDbHazelcastStore 15.2.3: PostgreSQL: The schema is no longer used in the index name, as this prevented tables from being created at startup on PostgreSQL.
