Release Notes 6.2.27 - Patch Release | 30.11.2016

Remarks

```
Release notes with changes since version 6.2.26.

Upgrade notes:
No special actions are required when upgrading from Appway 6.2.26 to 6.2.27.
```

Appway Platform (Core)

Bugfix

Area	Importance	Description
Integration Link	Low	Fixed an issue where calling a synchronous Integration Link did not reset the Version filter.

Appway Extensions

Change

Area	Importance	Description
Extension	Low	Web Services Extension 2.2.34: - Change: Removed unused references to 'soapOpHeaders' variables from the generated client. SOAP Headers can still be added using the $soapClient.headers.setElement('soapHeaders', [$mySoapHeaderElement1, $mySoapHeaderElement2, …]) or $soapClient.addSoapHeader($mySoapHeaderElement) functions. - Bugfix: The RESTClient no longer throws an exception when the returned HTTP status code is 304 or another code in the 2xx and 3xx ranges. In all other cases, the RESTClient throws an exception as expected. - Bugfix: Fixed an issue which caused an infinite loop when XSDs imported using the XSDToDataClass function had backward references to already imported XSDs. - Bugfix: Fixed an issue which did not reset the Integration Link Version filter for the RESTServiceComponent processor.

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 6.2.24: - Bugfix: Info Table: The Info Table component and its contents are now rendered correctly when no value is specified for the HTML Id property.
