Release Notes 6.3.24 - Patch Release | 06.09.2017

Remarks
```
Release notes with changes since version 6.3.23.

Upgrade notes:
No special actions are required when upgrading from Appway 6.3.23 to 6.3.24.
```

Appway Platform (Core)

Change

Area	Importance	Description
3rd Party Library	Low	Upgraded Spring to version 3.2.17 (from version 3.2.4).

Bugfix

Area	Importance	Description
Edit Profile	Low	If an avatar is uploaded which is not an image, the error message now only shows the file name and the file is removed before returning the error to the user.
Integration Link	Low	Fixed an issue where validation did not work correctly for integer values inside Integration Links.
RSS Feed	Low	Fixed an issue in Studio where URLs for Feeds included the host name in the path.
Screen Editor	Low	When using a Password Field component in a Screen, the browser no longer autocompletes other fields with the username which was saved for Appway.
Script Language	Low	The EVALUATERULE(null) function call now returns a meaningful log message.
Users/Groups	Medium	Fixed an issue where some users were not added to groups correctly, when these groups were associated with swimlanes and created dynamically.
Workspace Library Builder	Medium	When minification is active and a resource cannot be minified, it is now added to the concatenated resource file without modifications to avoid errors.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	IntegrationLinkComponents Extension 1.3.6: - Feature: ActiveMQNotifier: Added the 'JMS Message Type' property which allows to force the use of a specific javax.jms.Message implementation for sending JMS messages to queues or topics. Possible values are 'Text' or 'Bytes'.
Extension	Low	ScreenPDFRenderKit Extension 2.0.36: - Feature: Added the ScreenAuditVariablesSensor to monitor the size of the variable Process_Screen_Snapshots in the Value Store, which is used for screen auditing.

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 6.3.24: Phase Chevron ---------- - Bugfix: Fixed an issue in Internet Explorer where the rightmost phase in the Phase Chevron got cut when the screen had a specific zoom and width. Date Picker ---------- - Bugfix: When opening a Date Picker, it now keeps its shape (popup/fullscreen) for as long as it is open. - Bugfix: When the Date Picker is open and the screen gets resized, the Date Picker now remains open and re-positions itself if necessary. This behavior is now consistent across

		all devices including touch devices. - Bugfix: On touch devices with a soft keyboard, the Date Picker now always opens in the same mode (popup/fullscreen), regardless if the keyboard was visible prior to opening the Date Picker or not. - Bugfix: The Date Picker no longer closes when the appearance of a soft keyboard is triggered.
Extension	Low	Web Services Extension 2.3.42: - Bugfix: The TranslateFrom function now converts null to 0 (for XML). - Bugfix: The TranslateTo function now adds double quotes to Boolean values. - Bugfix: Primitives are no longer deleted when removing a SOAP Web Service.
