Remarks

```
Release notes with changes since version 7.1.3.

Upgrade notes when upgrading from 7.0.x:
- If your Appway installation uses a Relational database or Cassandra as a cluster storage
backend, you need to create the 'piindexdefinitions', 'piindexstatuses', 'piindexdata', and
'piindexdatasizes' tables manually. See the 'Cluster Storage Update' section in 'System
Upgrade: 6.3 to 7.x' for details: https://community.appway.com/screen/kb/article/system-
upgrade-6-3-to-7-0#22-cluster-storage-update
- To provide better guidance and avoid inadvertent styling specification errors, the
possibility to use 'not set' as a value for style references inside 'Style' Business Objects
was removed. In the unlikely situation that 'not set' was used to define a style reference,
validation returns an error in Appway 7.1. Fix the issue by specifying a 'Style' Business
Object for the affected style reference(s).

For details on upgrading to Appway 7.1 from Appway 6.3, see the article: 'System Upgrade: 6.3
to 7.x' at:
https://community.appway.com/screen/kb/article/system-upgrade-6-3-to-7-0

For documentation of new and existing features, see the Appway Knowledge Base at:
https://community.appway.com/screen/kb

For information on Known Issues in Appway 7, see:

-and-8-0
```

Appway Platform (Core)

Bugfix

Area	Importance	Description
Script Language	High	Fixed an issue where the indexed collection method addAll() did not work as expected.

Appway Extensions

Change

Area	Importance	Description
Extension	Low	DefaultIcons Extension 1.2.3: - Change: Added the 'Info Thin' icon and revised the existing 'Info' icon for design consistency. - Bugfix: Removed the 'Fill' property from the SVGs of the following icons to allow applying a color to them via a 'Style' Business Object: Appway A, Cog (Settings), Email, Flashlight, Minus Sign, Plus Sign, Appway Rocket, Star (Transparent), Star (Black), Stop Sign.

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 7.1.5: - Bugfix: In the 'Date Picker' Screen Component, the Back and Next buttons for switching between months now again work correctly on Internet Explorer 11. - Bugfix: Improved the focus handling of several Screen Components in the 'Form Channel' Screen Component.
Extension	Low	Component Extension 7.1.6:

		- Bugfix: Fixed an issue with the 'Ajax Throbber' Screen Component: Every time the throbber was triggered, the Screen darkened until it became completely black after the throbber had been triggered several times.
Extension	Low	ProcessAuditTrail Extension 2.4.2: - Bugfix: The Sync job no longer adds non-existent Process Instances to the logCommandVersions map.
Extension	Low	RelationalDbHazelcastStore Extension 11.0.3: - Bugfix: Configured a timeout (10s) for the validation query that is executed before the connection is returned from the pool.
Extension	Low	WebServices Extension 2.6.5: - Bugfix: Fixed the I/O statistics available for Web Services. - Bugfix: Fixed ordering issue in generation of XML content for REST services.
