Release Notes 6.3.16 - Patch Release | 16.11.2016

Remarks
```
Release notes with changes since version 6.3.15.

Upgrade notes:
No special actions are required when upgrading from Appway 6.3.15 to 6.3.16.
```

Appway Platform (Core)

Bugfix

Area	Importance	Description
Catalog Editor	Low	When exporting to CSV, user settings for export properties (such as delimiters) are now applied correctly.
Cluster	Low	Fixed a known issue where the Map Persistence sensor sometimes triggered a false warning/error after a longer period of inactivity.
Script Functions	Low	When executing the EXEC function, the content of the output stream was not always written to the output file specified as a parameter.

Appway Extensions

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 6.3.18: - Bugfix: Tab Box: Fixed a JavaScript error which occurred when a server-side action was specified for the 'oncallback' or 'ontabswitch' event on the Tab Box component. - Bugfix: DatePicker [Legacy]: Restored the original appearance as in Workspace version 1. Known issue: The Clear icon ('x') for the Dropdown List is not displayed when Appway is deployed on a context other than '/', for example '/appway'. This issue will be addressed in the next Appway Component Extension 6.3 patch release.
