Release Notes 6.3.14 - Patch Release | 22.09.2016

Remarks

```
Release notes with changes since version 6.3.13.

Upgrade notes:
No special actions are required when upgrading from Appway 6.3.13 to 6.3.14.
```

Appway Platform (Core)

Change

Area	Importance	Description
Integration Link	Low	Start Element: The maximum allowed number of concurrent asynchronous consumers was increased to 50.

Bugfix

Area	Importance	Description
Cluster	Low	Added exception handling in LockPoolForceUnlockRunnable.
Cluster	Low	Fixed serialization issues (ClassNotFoundException) that occurred when using classes from extensions in TestData business objects.
Default Properties	Low	Removed the obsolete "nm.admin.window.title" and "nm.admin.studio.title" configuration properties.

Appway Extensions

Change

Area	Importance	Description
Extension	Low	CustomSensors Extension 0.4.0: - Change: Refactored and cleaned-up the extension code for enhanced performance. Note: We recommend that users of Appway 6.3.x upgrade to this version of the extension.
Extension	Low	WebServices Extension 2.3.32: - Change: HTTP status code is now also returned when in the 3xx range (redirection messages). - Bugfix: Class attributes are now populated correctly when inherited from base classes. - Bugfix: Fixed an issue which caused a null pointer when the SOAPAction URL was null. The SOAP client no longer adds a SOAPAction header to the HTTP request if the SOAPAction URL is null. - Bugfix: WSDL with elements that wrap primitive types is now correctly imported. - Bugfix: The TranslateTo function now correctly maps Boolean patterns. - Bugfix: Log messages now refer to the correct HTTP verb when logging debug messages.

Bugfix

Area	Importance	Description
Extension	Low	DataStore Extension 3.2.3: - Bugfix: Fixed an issue which prevented correct inserts in MSSQL 2016 with the Microsoft JDBC driver.
