Release Notes 7.0.5 - Patch Release | 06.09.2017

Remarks

```
This document contains the Release Notes with changes since version 7.0.4.

Upgrade notes:
- No special actions are required when upgrading from Appway 7.0.4 to 7.0.5.
- There is an important Known Issue which affects multi-node installations. In some cases an
empty Studio window is rendered after a user logs in. See the Known Issues for Appway 7.0.5
for details and a workaround: https://community.appway.com/screen/kb/article/appway-7-known-
issues#11-appway-705-september-06-2017

For details on upgrading to Appway 7, see the article: 'System Upgrade: 6.3 to 7.0' at:
https://community.appway.com/screen/kb/article/system-upgrade-6-3-to-7-0

For documentation of new and existing features, see the Appway Knowledge Base at:
https://community.appway.com/screen/kb

For information on Known Issues in Appway 7, see:
https://community.appway.com/screen/kb/article/appway-7-known-issues

For information on deprecated and removed features in Appway 7, see:
https://community.appway.com/screen/support/news/feature-removal-and-deprecation-planned-with-
appway-7-0
```

Appway Platform (Core)

Change

Area	Importance	Description
Package Import/Export	Low	When a large number of Packages is installed on a System and the user clicks the 'Export' button, a spinning wheel now indicates the loading process.
Package Import/Export	Low	When importing a Package through the 'Import Packages' wizard, the imported Package is now displayed as highlighted in the Packages overview screen.
Search	Low	The search function for the dropdown lists displayed on the 'Entry Point Access Control' and 'Permissions' options of the 'Configure Package' dialog is now case-insensitive.

Bugfix

Area	Importance	Description
Ajax Update Area	Medium	Fixed an issue where the 'Ajax Update Area' Component did not work correctly in the interlined screen of the 'Data Table' component.
Case Engine	Low	Fixed an issue where the Case Engine did not handle some Primitive Types properly.
Edit Profile	Low	If an avatar is uploaded which is not an image, the error message now only shows the file name and the file is removed before returning the error to the user.
Modules	Low	Fixed a bug where adding an external module to Studio caused an exception.
Package Dependencies	Low	Removed the creation of unnecessary Package dependencies when moving Documents and Document Sets between Packages.
Refactoring	Low	Fixed a bug where an error dialog was not displayed when trying to start a Refactor ID operation while some Business Objects were still locked.
Script Language	Low	The EVALUATERULE(null) function call now returns a meaningful log message.

Appway Extensions

Feature

Area	Importance	Description
Extension	Low	Deployment Extension 9.0.0: - Feature: The extension is now Package-aware and available for use with Appway 7 (for versions 7.0.4 and higher). - Feature: The ImportPackages() function was added allowing you to import Packages

		through an AWDEPLOYMENT file. - Feature: The ImportSystemConfiguration() function was added allowing you to import server, content, or license properties. - Feature: The ExportSystemConfiguation() function was added allowing you to export server and content configurations to a ZIP file. - Change: The ImportContent() function only allows you to import Business Objects to the 'Base' Package (which means they must have been previously exported from the 'Base' Package). - Change: The ExportContent() function only allows you to import Business Objects from the 'Base' Package.

Bugfix

Area	Importance	Description
Extension	Low	Component Extension 7.0.4: - Bugfix: Fixed an issue in Internet Explorer where the rightmost phase in the Phase Chevron got cut when the screen had a specific zoom and width. - Bugfix. Fixed an issue in the 'Dropdown List' Screen Component where underlined text displayed in the Search results was not clickable.
